Module 3

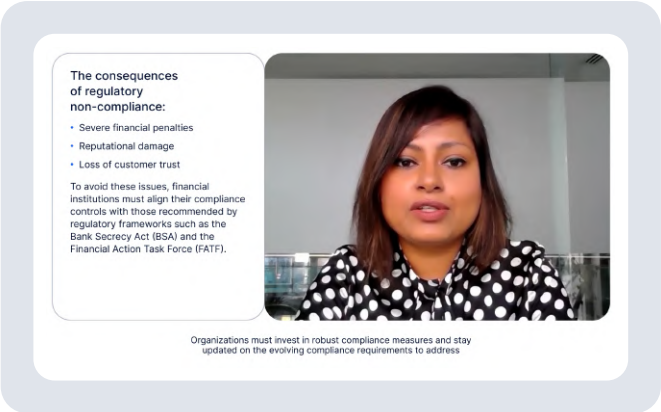
CFCS

Collaboration between Financial Institutions and Regulators to Improve Transaction Monitoring Effectiveness

Hosted by Sheetal R. Bhardwaj, Executive Board Member and Communication Director of the Association of Certified Financial Crime Specialists (ACFCS), MENA Chapter

Seasoned risk and compliance professional with hands-on experience in managing successful compliance programs in MENA and Australasian countries.

Key session takeaways

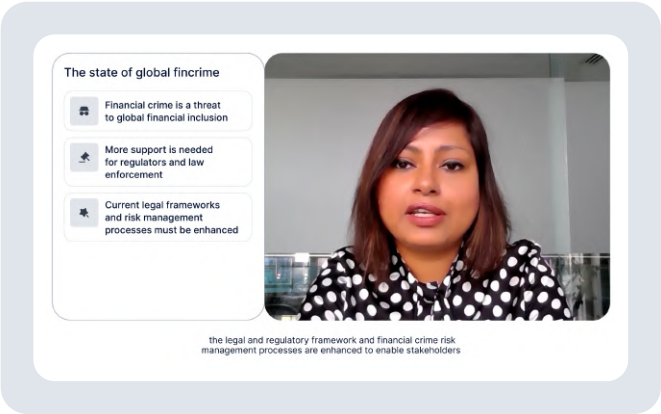


Session 1: The role of financial intelligence units (FIUs) in collaboration between financial institutions and regulators

Information-sharing initiatives are key to preventing financial crime because they encourage a culture of collaboration and strengthen collective efforts.

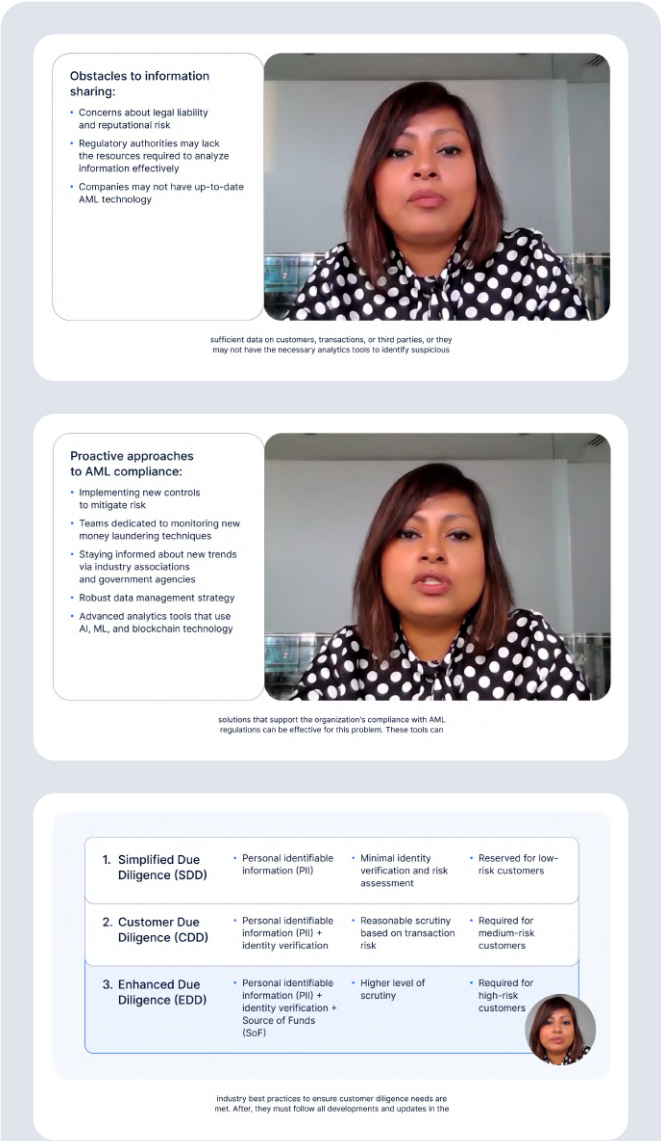
The consequences of regulatory non-compliance:

- Severe financial penalties
- Reputational damage
- Loss of customer trust



Outcomes of global financial crime:

- Financial crime is a threat to global financial inclusion
- More support is needed for regulators and law enforcement
- Current legal frameworks and risk management processes must be enhanced



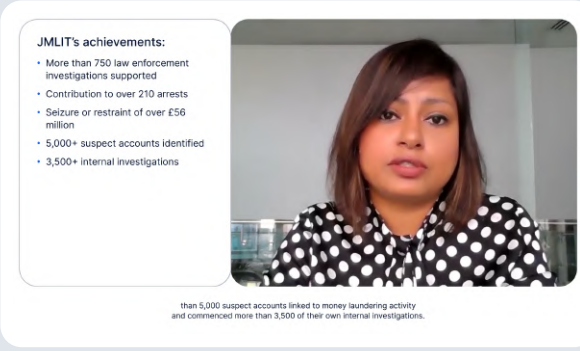
Session 2: Challenges to collaboration between financial institutions and regulators and how to overcome them

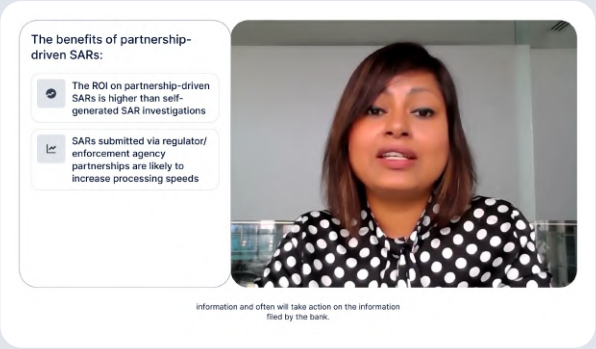
Obstacles to information sharing:

- Concerns about legal liability and reputational risk
- Regulatory authorities may lack the resources required to analyze information effectively
- Companies may not have up-to-date AML technology

Proactive approaches to AML compliance:

- Implementing new controls to mitigate risk
- Teams dedicated to monitoring new money laundering techniques
- Staying informed about new trends via industry associations and government agencies
- Robust data management strategy
- Advanced analytics tools that use AI, ML, and blockchain technology





Session 3: Case studies of successful collaboration between financial institutions and regulators on transaction monitoring

Joint Money Laundering Intelligence Taskforce (JMLIT): JMLIT is based in the UK and operates as a cooperative effort to strengthen the country's AML efforts through coordinated intelligence-sharing and analysis.

The Joint Money Laundering Intelligence Taskforce's (JMLIT) achievements:

- More than 750 law enforcement investigations supported
- Contribution to over 210 arrests
- Seizure or restraint of over £56 million
- 5,000+ suspect accounts identified
- 3,500+ internal investigations

Benefits of partnership-driven SARs

- The ROI on partnership-driven SARs is higher than that on self-generated SAR investigations
- SARs submitted via regulator/ enforcement agency partnerships are likely to increase processing speeds

Typologies: Financial crime typologies are categorized methods of various criminal methods used to exploit financial systems. They are identified by financial institutions and regulatory authorities to help combat financial crime.
